In The Claims

Please amend claims 1 and 7 as follows:

a1 1. (Once Amended) A pixel structure for a liquid crystal display, with a design of multi-domain vertical alignment (MVA), the pixel structure comprising:

a first substrate, with respect to a pixel, having a W-like extruding structure composed of two V-like structures formed on a surface of the first substrate;

an second substrate, parallel to the first substrate, having a plurality of openings, wherein the openings are aligned along a direction from a tip of the V-like structures to an edge of the pixel structure; and

a liquid crystal layer located between the first substrate and the second substrate, wherein the W-like extruding structure abuts the liquid crystal layer.

a2 7. (Once Amended) A baguette pixel structure with a design of multi-domain vertical alignment, comprising:

a first substrate having a W-like extruding structure composed of two V-like structures formed on a surface of the first substrate;
